

## In Madiba's footsteps

ROOTING commemorations in its academic Critical Studies in Higher Education (CriSHET), project was the University's contribution to honouring Nelson Mandela's legacy in a year- Africa (ISCIA) and the Centre for Philosophy in long Centenary Celebrations Programme.

## to chnge the world."

"Locating our programme in the academic enterprise resonates with the importance Mandela placed on education, illustrated so emphatically with his famous declaration that 'Education is the most powerful weapon which you can use to change the world'," said Vice-Chancellor Prof Sibongile Muthwa .

The programme saw Mandela University exploring the ethos of its new identity and bringing this focus into core teaching, learning, research and engagement.

The programme featured several facultydriven events, research initiatives and launches of Chairs and centres.

These included the launch of the Chair for

the Chair for Identities and Social Cohesion in Africa.

A "Dalibhunga: This Time? That Mandela?" colloquium, the inaugural Hubs of Convergence launch and a Gender Equity and Transformation conference are among activities rounding off the programme.

The programme has resulted in renewed energy for humanising pedagogy and a commitment to re-imagining engagement beyond the bounds of conventional university practices.

A new biometric screening system is about to be introduced at all on-campus student residences as part of an on-going safety and security implementation plan.

### Madiba paves the way

A PLETHORA of work exists on Mandela the individual - but there is still much to be unearthed about Mandela: as a social figure of justice.

This "excavation" of Mandela is what the three-day "Dalibhunga: This Time? That Mandela?" colloquium sought to explore.

"The colloquium fed into Mandela ame's launch in 2017."

A collaboration between Nelson Mandela University, the Human Science Research Council and the Nelson Mandela Foundation. its findings provide the framework for how the idea of a Transdisciplinary Institute for Mandela Studies (TIMS) can take shape at the University.

Vice-Chancellor Prof Sibongile Muthwa said there was a "staleness" in the higher education sector in terms of how it approached social justice.

"All universities (seem) social-justice oriented and throw around concepts of transformation, diversity, inclusivity, decolonisation, curriculum renewal and so on, in 'branding' and 'public relations' exercises."Nelson Mandela University . must reject this approach. Our work must be the University's branding. It must be able to speak for itself."

The colloquium fed into Mandela University's work on entrenching its identity, following the new names launch in 2017.

The University name change was more than just a removal of the 'Metropolitan' or 'M' in Nelson Mandela Metropolitan University (NMMU), but also, as then-Deputy President Cyril Ramaphosa said, a "statement of intent."

April 2019

A newsletter for friends of Nelson Mandela University

# Transforming spaces and places

A NAMING and renaming project ensuring that our University buildings and areas recognise, respect and honour all peoples in ways that resonate with our namesake, is underway.

The project follows the launch of our new name in 2017 and addresses the need to pro-actively build social cohesion in the wake of the Fees Must Fall protests - and actively contributes to transformation.

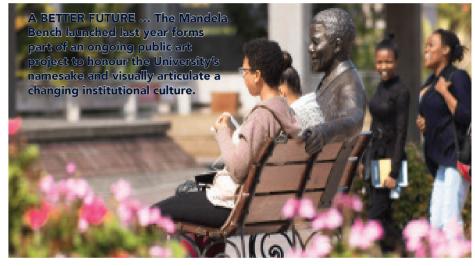

The process will also offer us the opportunity to build and enhance the intellectual identity of our brand, and simultaneously celebrate Mandela's centenary year.

Our staff, students and alumni have been encouraged to robustly engage in debate around the name choices as part of an open journey that seeks to build a future where everyone feels that they belong.

Social cohesion and inclusivity is the African institutional culture that we aspire to achieve at Mandela University, and the process - the The likes of Eastern Cape's Sarah Baartman, collective naming and renaming of buildings, spaces, roads and other places - will help enhance and enable this.

#### Students lead way

#### improvements to this end, including:

- The introduction of a student procession into the hall
- A cultural interlude at every ceremony
- The presence of a sign language interpreter in line with the university's commitment to access
- The addition of big screens to optimise viewing for all quests.

A ticketing system has also been introduced in line with new safety and security legislation.

#### **Every story matters**

"THERE is no greater pain than bearing an untold story inside you." - Maya Angelou.

The Mamela! Campaign, co-founded by graduate Lumka Cube (below) and her friend Onabo Bottoman, welcomes people to tell their life stories and encourages others to listen, believing 'every story matters'.

East London-born Lumka, 24, who will be receiving her Diploma in Management, started the campaign after her own journey with depression.

"I struggled to juggle my student leadership roles, studies and personal challenges, sought help from the University's Department

of Student Counselling and was later diagnosed with mild depression. I realised there was a great need for people to share their pain and feel heard," savs Lumka.

Mamela, which is an isiXhosa word that translates to 'listen', directly pleads to those surrounding struggling

students to start listening and paving attention to them. The campaign aims to aid individuals to lead mentally healthy lives to better equip them to succeed at university, explains Lumka.

"By listening to each other, we are already creating a platform to start the conversation about mental health and thus relieving the stigma behind seeking professional help."

Lumka, who currently works in the finance department at The Radisson Blu Hotel, was also awarded The Herald Citizen of the year 2017 in the Youth Category, for her non-profit organisation, Rising Sun Foundation.

The organisation offers charitable interventions aimed at alleviating difficulties faced by impoverished youth, providing holistic educational services to build responsible young adults who will in turn be able to respond to these difficulties.

One such intervention sees Education students from Nelson Mandela University volunteer as tutors, offering support to matric learners, with the aim to increase the matric pass rate in the Eastern Cape.

WONDERFUL news for the University's nature reserve is the birth of the first red hartebeest calf in well over a decade.

The calf was probably born sometime in January, making it about four to five weeks old, and joining a few young springbuck around.

The calf is also one of only three red hartebeest in the reserve, the other two being the calf's mother and an old cow, who has been here for about 14 years. They have a life expectancy of about 19 years, says nature reserve ranger Craig Breedt.

"Unfortunately we have not managed to take a picture of the new arrival since the red hartebeest is notoriously difficult to photograph due to its tendency to flee as soon as it senses danger. It's Africa's fastest antelope (about 80km/h) and it runs for long distances," he says.

### Teacher of the Year in 2018.
